DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 8, 13-17, 22, 27-30, and 37-39 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,802,699 (hereafter Fjelstad).

Fjelstad discloses, referring to figures 9-13, a flexible circuit comprising: a substrate (438) having a plane; a flexible and extensible structure (452, 456) formed within said substrate and co-planar with said substrate; and wherein said structure is adapted to be extended out of said plane by a distance greater than a maximum lateral dimension of said structure [claim 1], further comprising a pathway formed on said structure [claims 2, 17], wherein said structure is a spiral [claims 8, 22], wherein said structure has geometric features selected from a group comprising spiral, bend, curve, twist, turn, curl, loop, u-turn and zigzag (see figure 12) [claims 13, 27], wherein said structure is defined by perforations (446) [claims 14, 28], wherein said structure comprises a boss (454) for receiving a force to extend said structure out of said plane (see figures 12 and 13) [claims 15, 29], further comprising at least a first pathway (452) and a second pathway (456) [claims 16, 30].

Similarly, Fjelstad discloses, referring to figures 9-13, a substrate having a plane, a flexible and extensible structure (452, 456) formed within said substrate and co-planar

Application/Control Number: 09/981,840

Art Unit: 2841

with said substrate; and wherein said structure is adapted to be extended substantially perpendicular to said plane within the region defined by said plane (see figure 13) [claim 37], further comprising a pathway (452, 456) formed on said structure [claim 38], wherein said structure is a spiral (see figure 12) [claim 39].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Application/Control Number: 09/981,840

Art Unit: 2841

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 9-12 and 23-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fjelsted.

Fjelsted does not specifically disclose that the spiral comprises an Archimedes spiral, a parabolic spiral, a polygonal spiral, a square spiral, a triangular spiral, a pentagonal spiral or a hexagonal spiral. However, each one of these shapes is wellknown and a trivial variant of the generic "spiral" disclosed by Fjelsted. As such, one of ordinary skill in the art would be motivated to use any one of these well-known shapes as the "spiral" in the invention of Fjelsted since they are simple variants. Moreover, it has been held that more than a mere change of form is necessary for patentability. Span-Deck, Inc v. Fab-Con, Inc. (CA 8, 1982) 215 USPQ 835.

Allowable Subject Matter

Claims 1 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Claims 3 and 18 state the limitation "wherein said pathway is a capillary for transferring a fluid". This limitation, in conjunction with the other claimed limitations was neither found to be disclosed in, nor suggested by the prior art.

Art Unit: 2841

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeremy C. Norris whose telephone number is 571-272-1932. The examiner can normally be reached on Monday - Friday, 9:30 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamand Cuneo can be reached on 571-272-1957. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
